

Sri Lanka

Global Threat Indicators

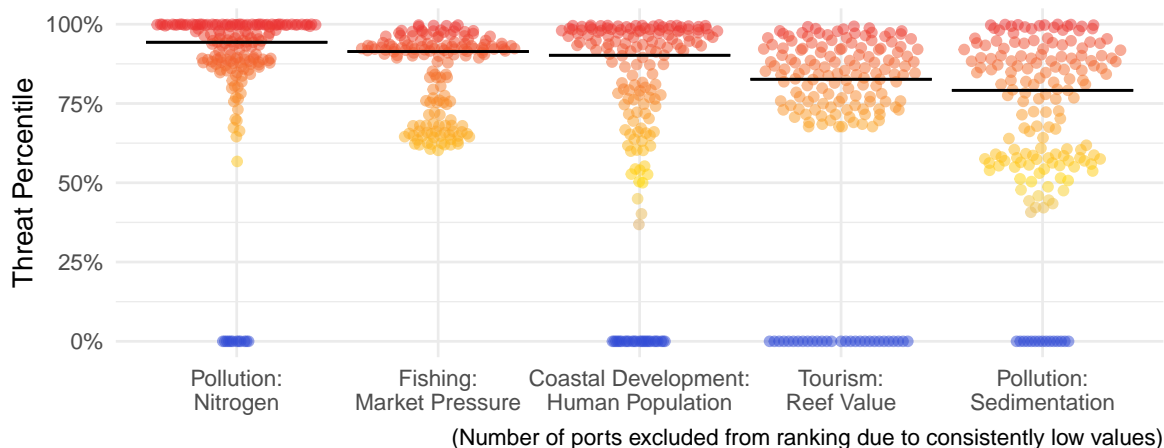

1) This is a mapping exercise that ranks a series of global data layers to understand the different contexts and/or threats of various reef locations. Local knowledge and validation is crucial.
2) Preliminary results are subject to change following scientific peer review; updated data layers can be found on https://programs.wcs.org/vibrant_oceans/Map

Top Two Threats

1. Pollution: Nitrogen
2. Fishing: Market Pressure

Threat Ranking

Threats ranked from highest to lowest; BCU average and pixels compared to all reef pixels
A value in the 50th percentile means that the BCU's average is higher than 50% of the world's coral reefs values

Global Context
