

## Sabalana Islands

## Global Threat Indicators

- 1) This is a mapping exercise that ranks a series of global data layers to understand the different contexts and/or threats of various reef locations. Local knowledge and validation is crucial.
- 2) Preliminary results are subject to change following scientific peer review; updated data layers can be found on <https://programs.wcs.org/vibranttoceans/Map>

## Top Two Threats

1. Fishing: Market Pressure
2. Coastal Development: Human Population

## Threat Ranking

Threats ranked from highest to lowest; BCU average and pixels compared to all reef pixels

A value in the 50th percentile means that the BCU's average is higher than 50% of the world's coral reefs values

## Global Context
